

# **Wisconsin FFA Foundation Announces SAE 2022 Grant Recipients**

The 2022 Wisconsin FFA Foundation SAE Grants were awarded in five categories: dairy, grain production, livestock, organic agriculture and start-up. Candidates were chosen based on the level and scope of their SAE project, as well as their age, financial need and future plans for their individual projects.

Through an SAE, agricultural students in Wisconsin (and nationwide) are able to apply classroom-learned concepts to real-world experiences. As one of the three components of the agricultural education model (FFA membership and classroom lessons being the other two), an SAE immerses students in situations beyond the classroom and hypotheticals. The SAE for All initiative has been growing around the state, encouraging every ag student to start an SAE project in order to prepare for future career opportunities.
